

YOU CAN SAVE MONEY ON YOUR WATER SUPPLY COSTS IN SCOTLAND

BUSINESS NEWS

WHAT'S CHANGED?

The water market in Scotland has opened up allowing customers to choose who they would like their water supplier to be. This means businesses are no longer bound to a national supplier.

Through competition suppliers will be forced to reduce pricing. Also customers with multiple locations can streamline their billing by using a single supplier that suits their budget and invoicing requirements.

WHAT WOULD I NEED TO DO?

You would need to compile data about the water services you use, check if they are being correctly levied, then tender the services to the open market and assess the package that best suits your needs and provides you with the greatest savings.

MY UTILITIES WILL TAKE CARE OF THE PROCESS FOR YOU.

MY Utilities will manage the entire process for you, collating all your supplies and identifying the best price available for you in the market.

WHAT SHOULD I DO NEXT?

Give us a call or drop us an email with your details. We will be in contact to confirm how your water supply information will be collated and then leave it to us to get you the best deal.
